

Telephone Systems

We supply the very latest phone systems, to save you money and provide your business with an easy to manage system.

What we offer

Choosing the right business telephone system is a challenge but choosing a provider that look after your needs is even more daunting.

At SBK we made the decision to provide fixed and mobile telephone capabilities through a hosted cloud based system that gives customers the flexibility to change their systems, and save on hardware & maintenance of typical outdated ISDN systems.

SBK offer an extensive range of capabilities through an easy-to-use web portal meaning you can manage your environment to maximise productivity. You'll never miss a call again as you'll be able to manage calls from anywhere, diverting calls to a mobile at a click of a mouse and pick up voicemails wherever you are. Ideal for multi-sites as calls are free between locations and improve customer contact with call holding, marketing messages and ease of transferring calls.

Using the latest Horizon hosted telephone system gives benefits such as:

- ✓ Lower cost calls
- ✓ Flexible working (Take your phone home)
- ✓ Business Continuity
- ✓ Enhanced Capability
- ✓ Number Choice
- ✓ Call Handling & Management
- ✓ Easy-to-use Web Portal
- ✓ Smartphone App
- ✓ Premium Handsets
- ✓ Gamma IP Network – reliable and secure
- ✓ Plus many more features

BE PREPARED for the BT ISDN Switch Off!

We can offer you a **FREE** no obligation communications audit and quotation to suit your requirements. **PLUS...** For enquiring, we will enter you into our monthly prize draw!
